Education

North Carolina State University

B.S in Computer Science | 4.0 GPA

August 2024 – Present

Raleigh, NC

Appalachian State University

Studied Computer Science, Minor in Mathematics | 3.9 GPA

August 2022 – May 2024

Boone, NC

Relevant Coursework: *Data Structures, Introduction to Theoretical Computer Science, Discrete Math, Linear Algebra*

Projects

class-search.com | *Python, Flask, PyTorch, Svelte, PostgreSQL*

- Developed a web application to search and discover relevant university courses by computing vector embeddings for over 30,000 gathered course descriptions from multiple institutions using PyTorch and pre-trained language models.
- Built a Flask backend to efficiently match user queries against the corpus of course embeddings by leveraging PostgreSQL with the pgvector extension for fast approximate nearest neighbor search.
- Designed an interactive Svelte frontend with dynamic content updates to provide a seamless user experience.
- Deployed the Flask web server to production using Gunicorn and Nginx, ensuring high availability and sub-200ms search latency through optimized vector search without external API calls.

MatrixOCR | *Python, OpenCV, Tesseract, SymPy*

- Developed a Python command-line tool to automatically extract mathematical matrices from images by integrating OpenCV for image pre-processing and Tesseract OCR engine, enabling efficient data extraction from screenshots.
- Leveraged SymPy library to perform Gauss-Jordan elimination and other matrix operations on the extracted matrices.
- Optimized image pre-processing pipeline using OpenCV functions like thresholding and contour detection to improve matrix detection accuracy to >95%

Experience

Summer Technology Assistant

St Timothy's School

Summers, 2018–2023

Raleigh, NC

- Managed Google accounts and Chrome devices for the middle school of over 200 students, utilizing automated account provisioning to reduce manual effort by 80%.
- Demonstrated strong problem-solving abilities by independently troubleshooting and resolving technology issues reported by staff while providing clear guidance.
- Troubleshooted technology problems from other staff.
- Grew into a leadership role over successive summers by proactively identifying process improvements to enhance overall technology support efficiency.

Youth Coach and Event Belayer

Triangle Rock Club

October 2021 – January 2023

Raleigh, NC

- Effectively communicated safety instructions and climbing techniques to youth and adult climbers in a clear and engaging manner to ensure a secure and enjoyable experience.
- Managed after-school youth programs by coordinating activities, delegating tasks to staff, and ensuring a structured yet fun experience for participants.

Organizations

FTC 2901 Member

Cardinal Gibbons High School

August 2018 – May 2020

Raleigh, NC

- Contributed as a programmer on the FIRST Tech Challenge robotics team to develop autonomous driving capabilities for the competition robot using Java.
- Collaborated in a team environment to enhance the robot's movement code quality through code refactoring
- Played a key role in enabling the team to qualify for FTC Nationals by delivering robust autonomous navigation software adhering to competition guidelines.

Technical Skills

Languages: Java, Python, R, SQL, HTML/CSS, \LaTeX

Frameworks/Libraries: Svelte, Flask, PyTorch, NumPy, Pandas, OpenCV

Tools/Platforms: Git, Vim, VS Code, PostgreSQL
